Most of the tax deductions shown on this screen come from company-wide settings and your Withholding forms (under **My Pay>Forms**). To change your tax withholding, you need to update your Withholding forms with HR. You can also simulate withholding variations on your paycheck to see how changes will affect your pay under **My Pay>Pay History>My**

Paycheck Simulator. If you charge your hours to different cost centers, you can see a breakdown of how taxes for each cost center affect your paycheck on your paystub.
